Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 November 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gilbilisco (U.S. patent no. 5,267,650) in view of Jacober et al. (U.S. patent no. 6,662,081). Gilbilisco '650 discloses a multi-compartment pill container for holding a quantity of medication, comprising: a housing, the housing having a top surface, two side walls, a front wall, and a rear wall, wherein the top surface has a plurality of openings extending vertically downward into the top surface of the housing; a plurality of compartments, each compartment selectively mateable with one of the housing top surface openings, each compartment being selectively removable from the housing, said compartment having a bottom surface, a top edge, four side walls, and a plurality of separation walls extending vertically between the bottom surface and the top edge, wherein the separation walls divide each compartment into a plurality of chambers, and a chamber cover (49) extends over each chamber, each chamber cover having a top surface and a flange (50) extending outward from the top surface for opening the cover. Gilbilisco '650 does not appear to disclose a timer. Jacober '081 discloses a multi-compartment pill container with a timer which can be programmed to signal proper medication dosage times. Therefore, it would have been obvious to one of ordinary skill

in the art at the time the invention was made to provide a timer to the multi-compartment pill container of Gilbilisco '650 as taught by Jacober '081 which can be programmed to signal proper medication dosage times.

With respect to the number of openings, compartments and chambers, this would be a design choice depending on the size and number of pills to be consumed and the routine optimization expected by one of ordinary skill in the art.

With respect to the type of indicia being used again this be a design choice depending on the size and number of pills to be consumed and the routine optimization expected by one of ordinary skill in the art.

With respect to claim 2, note the container lid (11) with clips (27, 28 and 29) to lockable secure the lid to the housing.

Allowable Subject Matter

3. Claims 6-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shown are multi-compartment pill containers analogous to applicant's instant invention.
